Date Mon 10/20/2025 8:22 AM

To Town of Peshtigo Chair <topchair@townofpeshtigo.org>

Ms. Friday,

Sure. EPA decided that the site should continue in our evaluation process. This stage is called an Expanded Site Inspection. It will entail planning for and conducting additional sampling in 2026 with a planned completion date to be late 2026/early 2027.

Please let me know if you have further questions. Thank you.

Hi Erica,

Just reaching out to see if you can share what the next steps are in the process. We have a board meeting scheduled Tuesday evening that I would like to provide an update if possible.

Thank you!
Jennifer

Thank you for this . . . As well as the warning about the document size.

Can you please let me know what the next steps are in the process?

Jennifer

Ms. Friday,

Yes, EPA had posted it on our public repository due to an inquiry. I caution that it is a large document, would recommend only opening via wireless network connection.

Hi Erica,

Was the report mentioned below ever released?

Jennifer

Subject: JCI Fire Technology Center Update

Ms. Friday,

Thank you for the request. Our update is as follows. Please let me know if there are questions.

The site investigation (SI) field sampling was conducted in late September 2024 for the JCI Fire Technology Center site. Sampling consisted of collection of groundwater from private wells. It also included soil, sediment, and surface water collection from the JCI Fire Technology Center facility. EPA

mailed validated sampling analytical results from the private well samples to the residential owners regarding their wells in October and November 2024, once results were available. The draft SI report has been submitted by our contractor and is undergoing review and revision. At this time, we expect to have the report ready for release to the public later this winter.
